HOUSEHOLD AFFAIRS,

EACH KERCHIEFS IN THE WARE, By putting lace handkerchiefs in warm water in which are a few drops of ammonia, and using castile soap, iron, but spread the handkerchief out smoothly on marble or glass, gently pulling out or shaping the lace. Just before it is entirely dry fold evenly and smoothly and place under a heavy weight of some kind and you will find handkerchiefs lasting thrice as long as before. - New York Journal.

HINTS ABOUT MENDING.

Nothing keeps flannels and stockings and other underwear looking so well as durning and mending and repairing material that matches perfeetly. A hole seems almost preferable to a gray stocking darned with blue, or black undershirt bound with red, or a brown patch where there should be a black one. Buttons, all kinds of mending threads, in cotton, linen, silk, and wool, bindings in taffeta ribbons by the roll, and white cotton tape of all widths, and even webbing by the yard are to be bought at most reasonable prices for making old things as good as new, and for keeping the new in perfect condition. It also seems to be an economy in the same direction to buy the same makes and colors in flannels and hose from season to season, so that one may have material to reinforce weak places without buying it .- New York Post.

IT WILL BE WISE.

To rub spotted lamp chimneys with salt before washing them.

To restore gilded picture frames by first removing the dust with a soft brush and washing the gilding in warm water in which an onion has been boiled. Then dry quickly with a

To wear well-fitting shoes about the housework; they will be less fatiguing than loose, untidy slippers that are supposed to be worn for comfort.

To remember that the usual methods for removing paint spots from clothing will not be satisfactory if the paint has become hard and dry. In this case use equal parts of ammonia and turpentine, saturate the spot as often as necessary and wash out in soapsuds.

To cut doughnuts out an hour or more before they are fried and allow them time for rising. They will be much lighter than when fried as soon as they are cut. Try cutting them at night and frying them in the morn-

To use melted alum for a handy cement. It may be quickly prepared, and may be used for mending anything which will not come in contact with heat and water.

To keep the ironing board and table blanket and sheet, with a quantity of holders convenient, so that the towels will not be burned out in their service, -New York Recorder.

CAKES FOR THE CHILDREN.

Plain Cup Cake-For two sheets of cake use one cupful of sugar, haif a cupful of butter, one cupful of milk, two cupfuls and three-quarters of sifted flour, the rind and juice of one lemon, three eggs, one teaspoonful of sods and two of cream of tartar. Mix the flour, sods and cream of tartar and sift the mixture. Beat the butter to a cream. Gradually beat in the sugar. Beat the eggs till light and beat them into the butter and sugar. Now add the milk, and lastly the flour. Beat vigorously for half a minute. Spread the mixture in two buttered shallow pans. Sprinkle with powdered sugar and cook for twenty-five minutes in a moderate oven.

Raisin Cake-Take two and one-naif cups of sugar, one-half cup of butter, one-half cup of sour milk, two spoonfuls of cream, one cap of chopped raisins, one teaspoonful of soda, onehalf teaspoonful of cinnamon and a bit of nutmeg. Flour enough to knead. Roll out an inch thick. Cut into oblong pieces. Bake quickly.

Soft Gingerbread-Stir two teaspoonfuls of sods and one of ginger into one cup of molasses. Add onethird of a cup of butter and one cup of warm water in which one teaspoonful of cream of tartar has been dissolved. Add three small cups of flour, mix together and bake.

Plain Spice Cake-Take one egg, two-thirds of a cupful of sugar, the same quantity of molasses and of butter, a cupful of milk, two cupfuls and a half of flour measured generously, une tempoonful of sods, one level teaappoinful of cream of tartar, one teaspoonful of vinegar or lemos juice, and one tablespoonful of mixed spice. Beat the egg well, and after adding to it the molamer, sugar, spice and butter-the latter being first meltedbeat again. Mix the sods with the milk and add to the other mixture the eream of tarter with the flour, and stir into the butter, and finally add the rinegar or lemon juice. Pour into two shallow pass and bake for twenty min-

stee in a moderate oven. Cookies-Two sups of sugar and one cap of butter beaten together, two eggs, yolks and whites beaten sepa-rately; one-half cap of sweet milk, one-half tempounts of sods, nuture, Flounds roll. - New York World.

It Killed Bim.

Vestris, the great dancing master, died at 83, and it was said he would have lived till a hundled but for a sudden and mortal blow in the shape of an advertisement. One day he they are easily washed and made a asked for a newspaper probably for beautiful, clear white. Then do not the first time in his life. Scarcely had he opened the sheet, when his eyes lighted upon the following: "Wanted, a professor of dancing at Calcutta. Must be a skillful chiropodist at the same time." He took to his bed and never left it again alive.

The Burden Beaver,

There is a big insulated wire in telegraphy which transmits the bulk of daily intelligence; there is a big insulated nerve in the human system which can bear the bur den of more pain than all the rest of the arry's combined, and is known as the sciatio nerve. Sometimes the wire is cut to cut off its current; sometimes the surgeon's knife is used to cut the nerve to relieve excruciating pain. But there is one thing which avoids this radical treatment; one cure which penetrates to the pain-spot, and sciatica has been cured almost without fail by the use of St. Jacobs Oil. It reaches misery's sest and dethrones it. Thus attacked and routed in its bidden ambuscade, pain seldom returns to annoy. The great remedy does its work well.

Too Honest.

Uncle D. P. Oliver, now a prosperous store keeper in a prosperous lowa village, once practiced law in Ohio. Being met by an old acquaintance, he was asked for the particulars of his giving up the profession.

"Didn't it agree with your health?" "Oh, yes," answered Uncle David. "Didn't it pay"

"Firs rate."

"Met with sufficient favor from the courts?"

"All I could ask." "Then what was it compelled you

to quit;" "Well, I'll tell you. I was too hon-

A loud laugh from the bystanders groused Uncie David Into earnestness, and he repeated the strange statement and nailed it to his shop counter with his huge fist. But his cross-questioner went on.

"When did you and this out?" "In my very last case."

"What was that?"

"One in which I was retained to prosecute a neighbor for killing a dog."

"And he was acquitted? So you lost the case and gave up your profession discouraged?"

"No; he was convicted." "Then be was guilty?"

"No; he was innocent?" "But didn't the evidence prove

his guilt?" "Certainly it did."

"Then why do you say he was innocent?"

"Because I had killed the dog mysulf a few nights before trespassing on my poultry; and I came to the conclusion that any business that would aid a man to convict a neighfirmly and evenly covered with a thick | bor of his own crimes was not the business for me; so I gave it up."

Have Plenty of Room.

ABSOLUTELY PURE

Trying the Mind Cure.

A New York merchant is reported by the Tribune to have found his office boy weathering one of the terribly hot days of last summer highly philosopical, and therefore worthyin its spirit, at least-of general imi-

It was a dull day, with nothing going on. The boy had taken off his coat and vest, and would have taken off his collar but that his employer objected. By and by the merchant saw him writing-putting down s word or two and looking out of the window alternately.

The merchant's curlosity was excited, and he stepped up behind the boy and looked over his shoulder. In front of him lay a foolscap sheet half filled with words like these:

"Ice-cream, icebergs, ice cold soda, North Pole, Greenland, Iceland," and so on.

of all cases of consumption can, if taken in the earlier stages of the disease, be cured. This may seem like a bold assertion to those familiar only with the means generally in use for its treatment; as, nasty codliver oil and its filthy emulsions, extract of malt, whickey, different preparations of hypophosphites and such like palliatives. Although by many believed to be incurable, there is the evidence of hundreds of living witnesses to the fact that, in all its carlier stages, consumption is a curable disease. Not every case, but a large per-centage of cases, and we believe, fully 98 per cent, are cured by Dr. Pierce's Golden Medical Discovery, even after the disease has progressed so far as to induce repeated bleedings from the lungs, severe lingering cough with copious expectoration (including tubercular matter), great loss of flesh and extreme emaciation and weakness.

Do you doubt that hundreds of such cases reported to us as cured by "Golden Med-ical Discovery" were genuine cases of that dread and fatal disease? You need not take cur word for it. They have, in nearly every instance, been so pronounced by the best and most experienced home physicians, who have no interest whatever in misrepresenting them, and who were often strongly prejudiced and advised against a trial of "Golden Medical Discovery," but who have been forced to confess that it surpasses, in curative power over this fatal malady, all other medicines with which they are acquainted. Nasty codliver oil and its filthy "emulsions" and mixtures, had been tried in nearly all these cases and had either utterly failed to benefit, or had only seemed to benefit a little for a short time. Extract of malt, whiskey, and various preparations of the hypophosphites had also been faithfully tried in vain. The photographs of a large number of those cured of consumption, bronchitis,

lingering coughs, asthma, chronic nasal catarrh and kindred maladies, have been skillfully reproduced in a book of 160 ceipt of address and six cents in stamps. You can then write those cured and learn their experience.

butt end of every vile paragraph in

The Cold Wave.

The cold weather of last Friday, Saturday, and Sunday is almost without a rival in all the cold times this country has ever had. The cold wind which blew unceasingly during this time is what made it particularly hard to bear. The lowest temperature reached at this point was 20 degrees below zero. It is to be hoped that the winter has reached its grand climacte-For seven weeks the ground ing this time ice a foot thick has been swept from the river by freshets, and the river is frozen up solid again. Last year, during these weeks, butterflies, bees, and grasshoppers were to be seen; rose bushes put forth leaves and dandelions bloomed; and people sat out of doors in the warm afternoons.

Horse Frozen.

The mail carrier crossing from Travelers' Repose to Huttonsville, over Cheat Mountain, had his horse frozen to death last Friday. He was ascending the mountain horse floundered into a snow-drift. The carrier went on walking. As soon as he came to a house, he obtained help and went back to shovel his horse out. The animal was heated, no doubt, for by the time they got it extricated it was so chilled that it was too stiff to walk, and died soon afterwards.

MINGO makes the number of counties in West Virginia fiftyfive. It is about half as large as Pocahontas, and contains about as many people. It has a railroad, the Norfolk and Western, and its county-seat is a town of about four hundred people. There was a Williamson, the Democratic town call on or address URIAH BIRD, against Long's Bottom, a Republican town. The Democrats and Republicans united in their desire to form a new county; the one wished to call it Kenna, and the other Garfield. They compromised on Mingo, the name of the tribe of Indians of which Logan was chief. The territory is rich in PAINT natural resources. It takes away the business portion of Logan County, and relegates it once more to a quiet and retired position from [A]] the world. The new county is on the Kentucky border.

Recent figures show that the total value of matches made and consumed throughout the world is but little short of \$200,000,000.

In 100 home families in New York, on the average, are found sixty-three that hire their home, fifteen that own with incumbrance, and twenty-one that own without incumbrance.

"In the United States three-fifths of the entire wealth of the country is owned by 31,000 persons-less than one-twelfth of one per cent, of the population," asserts the Farmers' Tribune.

The Commissioner of Indian Affairs has decided to gradually do away with the service of interpreters at the various agencies, etc., and to employ instead the Indian children who have been educated at the expense of the Government.

Twenty-five miles of the Congo Railroad in Africa, forming the first section between Matange and Kenge, are now completed. The work has cost \$100,000 a mile. The line will be ninety-three miles long in all, and will connect the immense waterways above Stanley Falls with the sea.

Since Florida orange growers have turned their attention to the developing of early and late kinds of fruit, it is possible to have oranges here all the year through, states the Philadelphia Presbyterian. With the aid of cold storage, the presence of fruit on the table is much more common than it used to be.

Iceland can hardly be considered as a new country, admits the Washington Star, for it was colonized before the Vikings made an excursion to the North American coast. Yet attention is now being directed to the resources of the island, and projects for development are being planned and pushed with the vigor usual when a new land has been opened for settlement. An English syndicate has secured a concession to build railways, and a line of steamers is to be established to run all the year between Iceland and Liverpool. The export sheep trade is the incentive that has given life to these commercial projects. Iceland's geographic position is such as to suggest it as a field for American enter-

It is encouraging to know that the scientific application of electricity to therapeutical work is gaining ground rapidly. Not only are medical men themselves actively investigating the subject, but electricians like Edison, Tesla, Elihu Thomson, A. E. Kennelly, J. J. Carty and others, are devoting considerable time and study to it. American medical papers contain many notes on new lines of work, and even the more conservative English press finds space to record advances in the electro-therapeutic art. The London Lancet contains interesting references to the very successful use of electricity in curing triceminal neuralgia, and to long continued treatment of cases of tiedouloureaux, which is practically the same thing. with long and short applications of the current. AN ANSWERING THOUGHT,

I'man be but a mere sojourner here-A berrowed presence from some distant

A passing shadow 'twist a smile and tear-A thing of fleeting breath,

Then, O ye heavenly choristers, draw near, And tell me what is death.

If mortal strength be but a borrowed might A circling sun that wanes before the night, A taper burning with a transient light, Borrowed from worlds above,

Oh, pause, sweet spirits, in your phantom flight,

And tell me what is love.

If human life is but a feeble spark-A flitting gleam consumed by shadows dark, Or spirits soaring upward, as the lark, Let me not blindly grope;

aboy! sweet sailors in your phantom bark, And tell me what is hope.

If my poor heart, a thing of trust and pray'r. Must throb-then vanish as dissolving air; If I must struggle through a world of care-A vicious, fleeting strife ...

Then tell me, O thou shapes of beauty rare, Tell me what is life.

Ah, yes! I hear you answer, clear and strong.

Like flood of deed, unfathomable song ; To live is Christ! To triumph over wrong The soul's sweet mission is:

Or day, or night, or life be short or long. "I's writ -ye are His."

I hearken not to Evolution's drone, The go liess critic or the cynic's tone; I ask but grace to "walk with God" alone-

Trustful, exultant, free : To bide the sacred presence of His throne,

Through all eternity. -Cleveland Plaindealer.

A MODERN WITCH.

HERE is something uncanny about the girl. cannot make her out," and Charlie Vanderveer puffed viciously at his cigar. "Why, the ing my palm, and ended by hypnotizing me. Jove, Tom, I was frightened-abso-

lutely frightened. "That is easy." answered Bransford, with an indulgent smile.

"What, the palmistry or the hyp-

"Both; and the frightening thrown

"Well, you will see her to-night, and can then judge for yourself. Here we are, now." Saying which they walked up the broad steps of a comfortable looking brown stone mansion and were ushered into the drawing room by a stately looking

Miss Morgan was as charming a girl as one would care to meet. She had beauty, numerous accomplishments, and, incidentally, wealth. Within the past few years she had developed a craze for anything bordering on the mystic or supernatural. At first it was palmistry, but recently it had developed into mird-reading, hypnotism and ingeniously planned though entirely unsuccessful wanderings of the astral body.

Yet she had impressed some of her friends to such an extent that they would dream nightmareish dreams about her, and when they informed her of the fact she would calmly announce that she really had been with them in astral form.

Tom Bransford thought of all this as he was presented to this self-confessed witch. To her credit be it said that the young lady thought too much of her personal appearance to adopt any outlandish form of dress; on the contrary, the tont ensemble, while certainly bewitching, was anything but uncappy.

After the first introductions and perfunctory conventionalities, the conversation was turned to the subject of hypnotism, and Bransford volunteered to become a subject with foolhardy daring "just to see what the sensation was like, as he meekly explained.

Overjoyed at the prospect of a new victim to experiment upon, the young bostess offered him an invitingly comfortable looking arm-chair, while she, seating herself before him and taking his hand in hers, directed that he should look steadily into her eyes. Bransford did so, while Miss Morgan fixed her lustrous eyes on his as though she would look him through and

"Don't stare at me that way too heart," interrupted Bransford. Estelle laughed. "You must not interrupt the physic current by talking ;

"Yer," replied Bransford, "the rais, and 400 or 500 pairs of birds are strangest and wildest sensations. I

A ord from the wise is often all and powerless in the chair. " have never been so successful,"

cried the girl, clasping her hands de- A MONTANA SHEEP RANCH, lightedly. "He has passed beyond the suggestion stage, and now must be in the somnambulistic stage." Then turning the limp form of Bransford, she commanded: "Stand up. You are now completely in my power, Stand up and open your eyes.

But Bransford did nothing of the sort. On the contrary his legs and arms became rigid, his teeth clenched, and his breathing labored.

cataleptic stage; but I think I had better wake him up, don't you?" "By all means," assented Vander-

Estelle turned pale. "He is in the

veer, whose face had assumed an almost greenish hae with fright. But in vain did this fair disciple

of Mesmer resort to passes, commands, and finally tearful entreaties. Bransford could not be aroused, and his condition seemed to become more serious every moment.

"Ob, Mr. Bransford, do wake up. If you have the slightest regard for me, I beseech of you to wake up, cried the girl, anxiously. "Oh, Mr. Vanderveer, do you please say something to arouse him, your voice will be more familiar than mine."

"Tom," cried Charlie, at the top of his voice, "wake up, old man." Then shaking him by the shoulders, he pleaded with him wildly. "Tom, old friend, you are all right. Wake up, Tom, if you love me, wake up." Then reproachfully to Estelle: "He told you he had a weak heart."

"Yes," she replied, now crying hysterically, "but I thought he was joking. Do please go for a doctor as quick as you can."

"But I can't leave him here, be'll fall on the floor," said Charlie. "Don't you think I had better carry him to the lounge?"

"Pray do, and then I can bathe his forehead with some extract and fan

him while you are gone.' Bransford's remains-for they hardly seemed to be more-were then laboriously half lifted, half dragged from the chair to the lounge, and a daintily embroidered pillow placed under his head. Estelle had in the meantime supplied herself with all other night I was available restoratives and took her up there, she place by his side, while Charlie hurstarted in by read- ried away for medical aid.

Left alone with her unfortunate victim, she unburdened her soul

"Oh, what have I done! Perhaps he will die. And I heard so much about him. I was sure we were going to be good friends. And I did like him from the moment I saw him this evening-and now I have probably killed him. Oh, how could I do it, how could I do it!"

A sort of spasm passed over the unconscious form before her, and she thought his breathing had ceased, so put her hand over his parted lips to see if she could feel any breath, when to her horror and surprise, the trembling hand was kissed in a most lifelike manner, and Bransford's dark eyes looked into hers with a hamorous twinkle.

"Remember," he said, quietly, "I am not responsible. I am hypnotized, you know." Then, still keeping her hand in his own, he sat up and asked gravely: "Don't you think that you have had a pretty good lesson in the danger of playing with edged tools and dabbling in occult arts you do not know anything about?"

"I think it was perfectly abominable and ernel for you to give me such a terrible fright," she cried, pulling away her hand.

"It might easily have really occurred. Come, now. You have said you like me, then forgive me, but promise to be a bewitching woman and not a womanly witch in the future. The day of witchcraft has long since passed; nineteenth century witches have no excuse for existing. Is it a bargain?"

"Rather a one-sided bargain; but I think you are right and I promise."

When Vanderveer returned an hour later, after calling unsuccessfully on five physicians, he found Tom and Estelle chatting as cozily together as though they had been friends for

"Yes," Tom said on his way home, "it was hard enough to lay there and stimulate unconsciousness while she was crying and you were carrying on like a lunatio; but when she put her dainty little hand on my mouth, why I simply could not resist. Ye gods, man, if it had been her lips, and Ido you think she ever would have for-

"Ob, yes," prophesied Vanderveer, gloomily, "and in time no apology will be looked for or required under similar eircumstances.

Charlie was right. - Truth.

TELEPHONES AND BAROMETERS PART OF THE EQUIPMENT.

The Large Clark Ranch and the Careful Way It is Managed-Looking After 40,000 Sheep.

AINBRIDGE S. CLARK, of Tarrytown, and his two sons, Walter and George, own the largest sheep ranch in Montana. The sons live on the ranch, and once or twice a year Mr. Clark, who has given up active business life, goes out there to look over affairs at the ranch and give his opinion on matters where it is advisable. On the ranch are no less than 40,000 sheep. The ranch is all fenced in, has ample equipments in buildings and extends lives. in one direction for a distance of forty miles. It is in Choteau County.

This ranch is run on what might be called scientific principles. That is, at this season of the year, and for the rest of the winter it is run according to the barometer. The ranch has six telephone stations. The approach of blizzards and other cold storms is so sudden in that country that it means a loss of many sheep, where herding is carried on extensively, if they are not rushed under shelter when these storms come. Whenever the barometer falls seriously word is telephoned at once to the stations on the ranch from the central house and the sheep are raced in, if necessary, for water. their protection.

3000, and two men go with them as of antiquity is now known to be in exherders. They are rounded up at night, and reports are made over the telephone every evening as to the day's work. This ranch is said to be the only one in this country fully equipped with the telephone. The result is that at any hour of the day the Clark brothers know the situation on any part of their ranch, and concerted action can be taken by the herders at any time on direction from the ranch office. The ranch has been an immense success, and this has come from the close application of business principles.

Life on the Clark ranch is very attractive. The chief house is a large two-story log structure. It is beautifully furnished with hangings and rugs, and it is full of gayety. The owners have a large yellow drag, and when Eastern visitors come out there on hunting trips it is a common sight to see a merry coaching party go dashing across the prairie. The mountains are near, and some fine lakes, notably St. Mary's are not far away. Shooting is excellent and close at hand, and it is not a long journey to Helena or to the other lively cities of

The Clark boys, as they are known out there, used to be prominent in the 400 of New York and Newport, as the 400 existed ten years ago, but they dropped society and its attractions from the moment they went into sheep herding. They had been brought up without the necessity for work, but their father insisted on giving them occupation with serious responsibilities. They proved their worth from the start. Every winter one of them has come home for a short visit, but it has been a stay always with a longing to get back to the rauch and to pitch into hard work there. They have studied every phase of the business and have worked with their own hands on the sheep.

Moreover, the young men have surrounded themselves with genial assistants. On their ranch, employed as herders, have been many of their acthrown on their own resources in an have been two German barons, who, several years ago, were social lions in swell society in the East. They liked open air life, and were willing to act as herders while their affairs were being straightened. On the ranch there are generally half a dozen such companions, and life in the central house in the evenings, with music and other attractions, is delightful. During the winter season these young men take their dress suits and drop down to Relena. Social functions take an added importance there because of their presence. They are much sought after as leaders in germans. Their dancing accomplishments always make them desirable

Mr. Clark hit upon an ingenious method of verifying their statements. land, he would be surprised to see Mr. Clark lugging out a big tin affair like a waterspout, about eight feet long. and stow it away in the wagon.

"The soil is six feet deep here," an agent would say when a certain spot would be reached.

"we have had it tested all over here."

"Of course," the agent would say:

"I guess I'll try it myself," Mr. Clark would respond. Then he would bring out his tin arrangement and begin to push it down into the ground. It was simply a huge auger and it told the tale to the inch as to the earth's depth. Mr. Clark also had a sort of cheese box made, and with this and his auger to aid him no land agent could deceive him, willingly or unwillingly, as to the soil's depth. - New

Cost of Running Trains.

Probably few travelers, even those who daily have occasion to use the railway, have ony adequate idea of the cost of running trains. The cost may differ, and doubtless does differ greatly with the varying conditions, but the recently published figures of one of the extensive Western systems are instructive. The Chicago, Milwankee and St. Paul Railway, operating 6147 miles of road, has made public an analysis of expenses per revenue train mile run for the past two years, the total miles run being 31,753,418 in 1893, and 26,692,470 in 1894. The items include repairs of locomotives and cars, station service, train service, into the wheat country of North Da- train and station supplies, fuel, oil kota to investigate. Land agents and waste and miscellaneous expenses. were bragging to him constantly as to The total operating expenses were the depth of the black soil out there. 96,46 cents per revenue train mile in 1833, and 92.67 cents in 1894. The revenue from passengers per train mile run was only \$1.51 cents in 1863. and 90.32 cents in 1894, or less than an agent would drive up to the notel cost. But there was a profit on to take Mr. Clark out to see some freight service, the revenue per mile run being \$1.5701 to 1893 and \$1.5934 in 1804, and out of this margin between receipts and expenditures per mile has to come the return for the enormous investment in reads, relling stock, structures and other property stated in a general way, it come about "Are you sure?" Mr. Clark would a dollar a mile, actual operative expenses, to run a train, without allowing any return on cost of road of equipment - Providence Journal.

MIGHTY PEKIN.

ALL ABOUT ITS QUEER SIGHTS AND STRANGE PROPLE.

Capital of One-third of the World-Walls of Pokin and Three Different Cities Enclosed --Its Great Markets.

EKIN, writes Frank G. Carplaces where the floods of last winter good money for them. faced inside and out with bricks, each space between is tilled with earth and stones so rammed down that the ages have made the whole one solid mass. They are built, in fact, much like the great wall of Chins, and the bricks of the two are almost exactly the same. I have before me a brick which I brought from the great wall. It weighs about twenty pounds, or as much as a two-year-old baby. It is bine gray in color, and it is covered with patches of white lime mortar just like those that I saw in toe broken places of the walls of Pekin.

In approaching Pekin, long before you get to the city, you see the immense towers which stand on the top of this wall over the gates which enter the city. These towers are as tall as a big New York flat. They rise nine stories above the wall, and they have roofs of blue tiles. They were used in the past as watch-towers, and they have many port holes for cannon. There are thirteen gates which lead into the city, and the towers and the walls near these are plastered over with proclamations and bills much like a theatre billboard. The gates of Pekin are merely holes through this wall, and they are about as wide as the ordinary street and perhaps twenty feet high. They are lined with stone and are beautifully arched. They are closed at night with great and you see hogs trotting about | The most interesting part of Pedoors sheathed with iron, and they through the streets of Pekin. I could they move through the city. There

lutely unsafe to move about in the night time without a lanters, if you wish to keep your feet clean, and you have to balance yourself in the day to keep out of the mud. All of the houses are of one story, and the Government departments look more like broken down barns than the offices of a great empire.

I went one morning to visit the State Department, and as I looked at it I thought of our great building of the State, War and Navy, which cost, you know, more than ten million dollars, and which is the biggest granite building in the world. The street was a mud puddle, and I hugged low, shackly buildings till I finally came to a gate at which a dirty official was standing. He shook his head as I entered, but I pretended not to see him, and pushed my way in. I entered a court, which looked for all the world like a barn yard surrounded by low wooden stables, with heavy tiled roofs. This court was filled with donkeys, horses and dogs, and half-naked children sprawled in front of the doors to these buildings, which were, in fact,

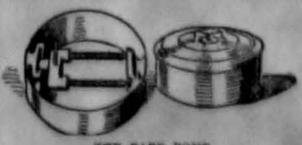

MANDARINS SALUTING.

buildings were filled with clerks, who wrote away at bare tables, the light scowled at me as I looked, and one of them gave me to understand that I had better move on. I next visited the famous Hanlin College. It was worse than the State Department, and board of punishments, where the horrible cruelties which the Chinese Government metes out to its rebels and criminals are passed upon, and where torture is common, but I was stopped at the door and was positively told that I could not go in. It was the same with all the Government departments. They could not have been shabbier had they been knocked up out of odd pieces of old Noah's ark, and everything was filthy and the picture of ruin. The only really new things in the city seemed to be the clothes of the officials, and I laughed again and again as I saw these mandaring bow down in the mud and go through the forms of the Chinese court amid their filthy surroundings. They are among themselves, as far as words go, the most polite of all nations, and they look upon us as boors and barbarians. The most of the people believe that they will conquer the world, and I doubt whether a thousand out of the million and a half people in Pekin know anything of the Japanese victories. The court officials distribute all sorts of lies, and they have probably told the people that The walls of Pekin are twenty-seven shadow of the Emperor's palaces, and population on the globe, and in it they have whipped the Japanese miles long, and the area which they they are the dirtiest hogs in the world. lives the son of heaven, the Emperor on both land and on sea, and that the Mikado will be brought to Pekin. The majority of the citizens of the Chinese capital really believe that America is subject to China. They think that Colonel Denby is sent to the capital to pay Uncle Sam's tribute to their Emperor, and this, I am told, is their opinion as to every foreign legation. They have nicknamed the street upon which the foreign ministers live "the street of the subject nations," and they would consider it a disgrace to ask our ministers to dinner, and I venture that Colonel Denby has never been on intimate terms with a dozen highclass Chinese officials, Americans, but it is actually the

ARMSTRONG ON JAILS.

A Few Particulars of a Late Attempt to Escape from Jail. Cut This Out.

We were too much erowded last week to give a full account of the night Armstrong put in in his vain endeavor to deliver himself, being confined in the Huntersville jail. and, at my office in the town of Mar- He has wished since that he had fully appreciated the comforts of his cell at Huntersville, and had to the next term of said circuit court not trifled with the "best jail in the State."

Armstrong was put in jail on Saturday, January 26th. On the sink in one corner of his room and found that the sink in the next room connected with this one by Third. Any other matter deemed means of a pipe. This gave him a hole through the six-inch partition to begin with. Waiting over a week, he and his cellmate, Barton Douglas, another negro, pulled away the sink again, late Tuesday night of last week, took a peice of their bedstead and pushed away hole sufficiently for them to crawl

All went well until the smoke threw water on it, which made the next as securely locked as their own. Now the smoke question was getting serious. The oak wood was smoking strong enough to have cured all the Hams in Pocahontas of everything. The negroes in the ground floor smelt the smoke, for there was not a chink for it to escape. They thought the jail was on fire, and yelled like NOTICE is hereby given to all par- demons. Armstrong and Douglas 1894, I will proceed, at my office in the Then they raised their voices, too, and the old jail must have sounded as though the famous "forty devils" were confined therein. The 1st. A statement of the account of four negroes yelled all night, until the town woke up about five o'clock next morning. The prisand even late in the day they could scarcely see anything.

Now Armstrong finds out what his effort cost him. He is buried alive in the new Marlinton jail, which is a terror to all possible where a stove is kept burning to warm him. He exchanged a comfortable room, with a wood fire and light, for this metal concern. Formerly he could look out of a window on a road, but now he is too far from the window to see anything, and will not even catch a glimpse of the sky when the frost come in and chat with him, and his surroundings will give him as much satisfaction as if he were at the bottom of a well.

When Eaby was sick, we gave her Castoria. When she was a Child, she cried for Chstoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.

ment in the place.

About Panthers,

The panther has been the terms the only one realy feared by the sive feeling that one is following snarl when prowling around the is a wide division as to the belief that the panther fears a camp-fire Some hunters saying that a fire however small is a perfect safeguard, and others who aver that panther lay and watched them all night within three feet of the fire, built before the open door of their shanty. All agree the panther is practically fearless of men at night.

Panthers hunt deer with t greatest sagacity. A deer freshly killed by a parther was found and appropriated by a hunter on Eli his winter. Another hunter was in danger from one lately on Elk He was tracking a deer in the
